Memorandum for the Files
(T. H. Moser)

Subject: Right-of-Way survey on Montoya Main Lateral, Montoya
"C" Lateral, and Montoya Drain in Block 2, El Paso Co.,
Texas

A survey was made on various dates in February and March and on April 1, 1954 by Jack Radman and party to establish the right-of-way on Montoya Main Lat., Montoya "C" Lateral and Montoya Drain in Block 2, El Paso Co., Texas, to establish and monument our rights-of-way adjacent to the Marwood and Eleanor Acres subdivision. The dimensions and bearings shown on the county plat were used wherever possible, and existing right-of-way markers were used whenever they could be located to the extent that it appeared they were reliable. The results of this survey are shown on Dag. 23-503-5581.

The survey of right-of-way adjacent to Tract 9 was made first. The centerline of Birdway Road was established. The property corner at the intersection of Birdway and Montoya Main Lat. was set. The distance shown on the county plat was measured along Birdway and the county's bearings and distances were used along the east and west sides of Tract 9. This tract had previously been surveyed by Mr. Love of the Love Construction Co., and the corner at the intersection of Montoya "C" Lateral and Montoya Drain coincided with his stake. He had also set a pipe at the intersection of the centerline of Eleanor Way and Montoya "C" Lateral. This point was accepted and the bearings and distances along Montoya "C" Lateral were laid out to meet these established points. Closure was computed on this tract with an error of closure of only 0.13 ft.

Next the south side of Montoya "C" Lateral was laid out. A 50 ft. offset on the west end of this line was used because a house was on the right-of-way. A bearing of $N12^{\circ}41'W$ was turned off, a computed distance of 232.3 ft. was measured, and an existing pipe corner marker was found. This corner was accepted as the original survey and used as the true corner.

Next the centerline of Frontera Road was established by running from a spike found in the highway to spikes found at Boy Scout Road and Gibson Road and other spikes along the centerline. It was believed that this firmly established the centerline of Frontera Road even though several pipes along the southern property line of Block 2 were at varying dimensions from this established centerline.
